

Certified Logistics Technician (CLT) Program

The Manufacturing Skills Standard Council (MSSC) is the authoritative body for both the foundational certification and the mid-level certification offered with this program. They believe that this program will, ***“recognize, through certification, individuals who demonstrate mastery of the core competencies of material handling at the front-line (entry-level through front-line supervisor) through successful completion of the certification assessments”***. The MSSC also sees a great benefit for the employers as well to help, ***“ensure their workforce increases the company’s productivity and competitiveness”***.

Virginia’s distribution industry employs nearly 69,300 people, primarily in trucking (20,200 employees), warehousing (19,500 employees) and transportation support (14,300 employees), while it also supports \$6.6 billion in economic activity in Virginia!
